■ Summer School 2021 ■

The Concept of „Health“ and its Implications for Public Health Issues

June 20 – June 27, 2021

In Cooperation with the Aristotle University Thessaloniki, University of Crete, Sofia University „St. Kliment Ohridski“, Catholic Private University Linz, University of Novi Sad, University of Sarajevo, University of Tirana, University of Belgrade.

INVITATION

The Summer School takes up the question of the concept of health. This is central to the entire field of medical ethics and also medicine. Our Summer School relates this question in particular to implementation problems in the public health system as well as to the tensions that exist in principle between the individual good of „health“ and variable political objectives in the field of state health care. Last but not least, reference will be made to guiding concepts of public health, as they have been discussed anew and on an interdisciplinary basis since the Corona pandemic.
